

ID	Requirements	Priority	Days	Because
1	Customers must be able to register and log in. However, it would be great if we could already create accounts for customers we know about and e-mail them their usernames and passwords.	Must	3	Because this is a sales website, authenticating buyers' identity is a must. Customers who make purchases must log in before buying something, which enables TOG to verify identity and deliver to the correct address.
2	Customers must be able to search and browse different products, whether they are logged in or not	Must	5	This is a basic function of a sales website. Because this function will help users to find products quickly. Lack of this function will make it difficult and time consuming for customers to buy the product.
4	People should be able to contact us for bespoke items and the system should facilitate communication with them, including messages and sending pictures.	Could	6	This is a function that many glassblowers are interested in but according to course work, it does not contribute too much to TOG's revenue. So this function has little impact on the system.
7 gôp 14	As a Customer I want a choice of delivery slots so that I can arrange my diary appropriately.	should	5	
8	As the Operations Manager there needs to an ability to track an item's lifecycle, from where the order is placed, up to the point where customers sign for the item they receive. Alerts should be sent to people in different phases of the lifecycle, like notifications for a job.	should	5	
9	As the Operations Director I want to gather statistics on item popularity	should	5	
11	As a Warehouse Operative I want to check delivery addresses so that I can place orders with similar postcodes in the same delivery batch.	should	3	
19 vâ 16	As the Managing Director I want to be ensured that the site is Data Protection Act safe so that we do not get fined hundreds of thousands of pounds.	Must	2	Because this is a sales website, the data security is very important. According to Managing Director, violating data protection laws can be a lot of fines, so protecting data is one of the top priorities of the system.
18	As the Marketing Director I would like promotions page so that we can inform our customers of current discounts on offer.	could	3	

B2. Use the MoSCoW/Timebox rules to prioritise the requirements in your updated ‘high level requirements list’.

B2.1. Produce an updated ‘high level requirements list’ clearly showing the prioritisation you have given to each of your requirements.

There is no word limit for the answer to B2.1.

B2.2 Explain how you set about prioritising the requirements and justify your reasons for the decisions that you made.

Your answer to B2.2 should be in the region of 500 words.
